

RT-ENG-1/89-143

JUN 06 1989

AVOID VERBAL ORDERS

TO: Distribution
FROM: RT-ENG-1/M. Glenn
SUBJECT: NSS/GO-1740.9 Implementation Working Group Meeting
Minutes

The fourth meeting of the KSC NSS/GO-1740.9 Implementation Working Group was held on June 2, 1989. KSC NSS/GO-1740.9 implementation status was presented by RT-ENG-1.

Individual meetings with representatives from CS, TE, SI and TV were held prior to the fourth working group meeting. Generic recommendations concerning NSS/GO-1740.9 design noncompliance fixes and design noncompliance acceptances were discussed at these meetings. RT-ENG-1 summarized the results of these meetings. It is still intended to present detailed recommendations to a special Level III Risk Review Board for disposition, tentatively scheduled for July 1989.

RT-ENG-1 mentioned that the KSC list of non-load test structural slings was submitted to RQ-POL on June 1, 1989 for review. This center-wide list, to be published as K-RQ-0002.1, will supersede Appendix A of KSC-STD-SF-0001D (Safety Standard for Lifting Devices and Equipment). KSC-STD-SF-0001D will be cancelled as soon as K-RQ-0002.1 is approved and released.

Brad Lytle mentioned that all the paperwork had been submitted to cancel KSC-STD-Z-0002B (Design Requirement for Lifting and Hoisting Equipment). As a matter of fact, effective June 1, 1989, KSC-STD-Z-0002B has been cancelled and superseded by NSS/GO-170.9 per DRA E-09FY091-1015.

The PGO contract was amended April 7, 1989 to reflect use of NSS/GO-1740.9, effective June 1, 1989. Contract Management has submitted paperwork within the past few weeks to update the SPC and BOC contracts accordingly. RT-ENG-1 (M. Glenn) took an action to verify status of the ESC contract with respect to NSS/GO-1740.9.

It was decided that RT-ENG-1 will meet individually once more with CS, TE, SI and TV before our next working group meeting to review details of proposed recommendations concerning NSS/GO-1740.9 design non-compliance fixes and acceptances. Our next working group meeting is tentatively planned for early July 1989, prior to the special Level III Risk Review Board review.

RT-ENG-1 (M. Glenn) intends to summarize an accumulated list of recommended changes to NSS/GO-1740.9 prior to our next working group meeting.
