

AVOID VERBAL ORDERS

RT-ENG-1/90-61

DATE: March 21, 1990

TO: Distribution

SUBJECT: NSS/GO-1740.9 Implementation Working Group Meeting Minutes

The sixth meeting of the NSS/GO-1740.9 Implementation Working Group was held on March 15, 1990. KSC NSS/GO-1740.9 Directorate implementation/review status was presented by RT-ENG-1. A draft revision of NSS/GO-1740.9 dated February 1990 was handed out and discussed; comments are due to NASA Headquarters by April 30, 1990. RT-ENG-1 will be the point of contact for KSC comments to the draft. There was also discussion about crane load testing. In particular, CS-PSD-3C and MDSSC proposed that the annual load test for the payload cranes should be expanded, to include full movement of the hoist up and down versus current procedure which performs the test close to floor level. RT-ENG-1 will set up a separate meeting to discuss this issue further.

The next meeting of the NSS/GO-1740.9 Implementation Working Group is tentatively planned for the week of April 16, 1990. Comments to the February 1990 draft revision of NSS/GO-1740.9 will be discussed at this meeting. It is requested that your comments be submitted to the undersigned by April 13, 1990. If this is not possible, please bring 25 copies of your comments to the meeting. A meeting notice will be distributed with the exact date and time.
